

“SUR”

“SUR” is a 60’ (18 metre) traditional Dhow located in Zanzibar, Tanzania. She was built in India in 1991 and entirely using high quality Indian Teak. Soon after she was built, she sailed to northern Germany where she was converted into an ocean sailing yacht capable of major ocean crossings. Upon completion of her refit, she sailed around the world and most recently the western Indian Ocean until she arrived in Tanzania where she is now permanently based.

SUR has just completed a major refit that included many new comforts and modern navigation equipment being added to her. Although she now provides modern comfort and electronics for a luxurious cruise, she retains the traditional Dhow design as well as the *Lateen* sail. In essence, she is very much a Dhow. Arguably

SUR is the most beautifully set up day and live aboard excursion Dhow in East Africa.

Specifications and Information

1. Boat Specifications:

- **Builder:** Traditional Dhow Builders
India
- **Model:** Traditional Build
- **Type:** Traditional Indian Dhow
- **Year of Manufacture:** 1991
- **Length:** 60' (18 metres)
